

Kitchens & Worktops Ltd

Flat-Pack Carcass Specification

Our incredible range of high quality, fantastic value Flat-Pack cabinets are manufactured using high quality 18mm thick Melamine Faced Chipboard, with 18mm back panels on the base units and 8mm back panels on wall units, and all visible edges are lipped.

The carcasses are produced using computer controlled machinery to give a consistently accurate build quality which is recognised within the industry.

All hinges are Blum Soft Close "clip on type" with full three way adjustment.

There is even the possibility to make in special sizes, with only a small surcharge!
