

Mirostone[®]

SOLID SURFACES FOR EVERY ROOM

Please ensure the Sample Collection
Book is returned to this position

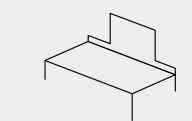

Mirostone® is a range of versatile
worksurfaces that have all the beauty
and feel of natural stone combined
with exceptional practicality.

Seamless Joints

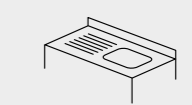

Upstands & Splashbacks

Island Units and Breakfast Bars

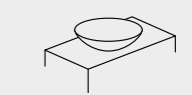

SOLID SURFACES FOR EVERY ROOM

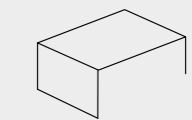

Sinks and Drainer Grooves

Curved Edges

Bathrooms

Decorative End Panels

Mirostone® is the ideal kitchen surface.

This image shows you some of the practical and beautiful features you can have incorporated into your kitchen surfaces.

1. Worksurfaces
The surface that works the hardest! Seamlessly incorporating sinks, drainer grooves, taps and hobs on the surface and cooking, washing and refrigeration appliances underneath.

2. Island units and breakfast bar areas
An extra wide surface for preparing food, eating with friends and family and even a place for the children to do their homework. A multi-functioning surface in the heart of the home: the kitchen!

3. Upstands
Colour matching all of your other Mirostone® surfaces, upstands give you a hygienic and durable barrier to water and impact.

4. Splashbacks
A cost effective and totally hygienic alternative to tiles. Easy to clean: just a wipe down is all that is needed. And, of course, Mirostone® splashback colours match all of your other Mirostone® surfaces.

5. Hobs
In this image we have shown a range cooker, but Mirostone® is equally at home with a hob incorporated into its surface.

6. Sinks with drainer grooves
You can choose from a Mirostone® pure acrylic solid surface sink, a stainless steel sink or a ceramic sink. All of them work perfectly with Mirostone® surfaces. And, you can have 100% water proof drainer grooves incorporated into your Mirostone® surface to drain water into your chosen sink.

Decorative end panels
Although not used in this image, decorative end panels are a great way of seamlessly returning your Mirostone® worksurface or island unit to the floor. Take a look at the images on Pages 14 & 15 to see what we mean.

Ask your kitchen designer for advice on how Mirostone® could work for you and your dream kitchen.

Fully
versatile

MULTIPLE USE

Mirostone's unique qualities make it the perfect surface for your kitchen, but it is equally at home being soaked in a busy bathroom or creating an air of sophistication in the bedroom.

Feel of natural stone

BEAUTY WITHOUT THE EXPENSE

Mirostone® replicates the beautiful look and feel of natural stone, touch it and find out! It is cool to the touch and it's authentic, naturally inspired designs blend elegantly with kitchens of all styles.

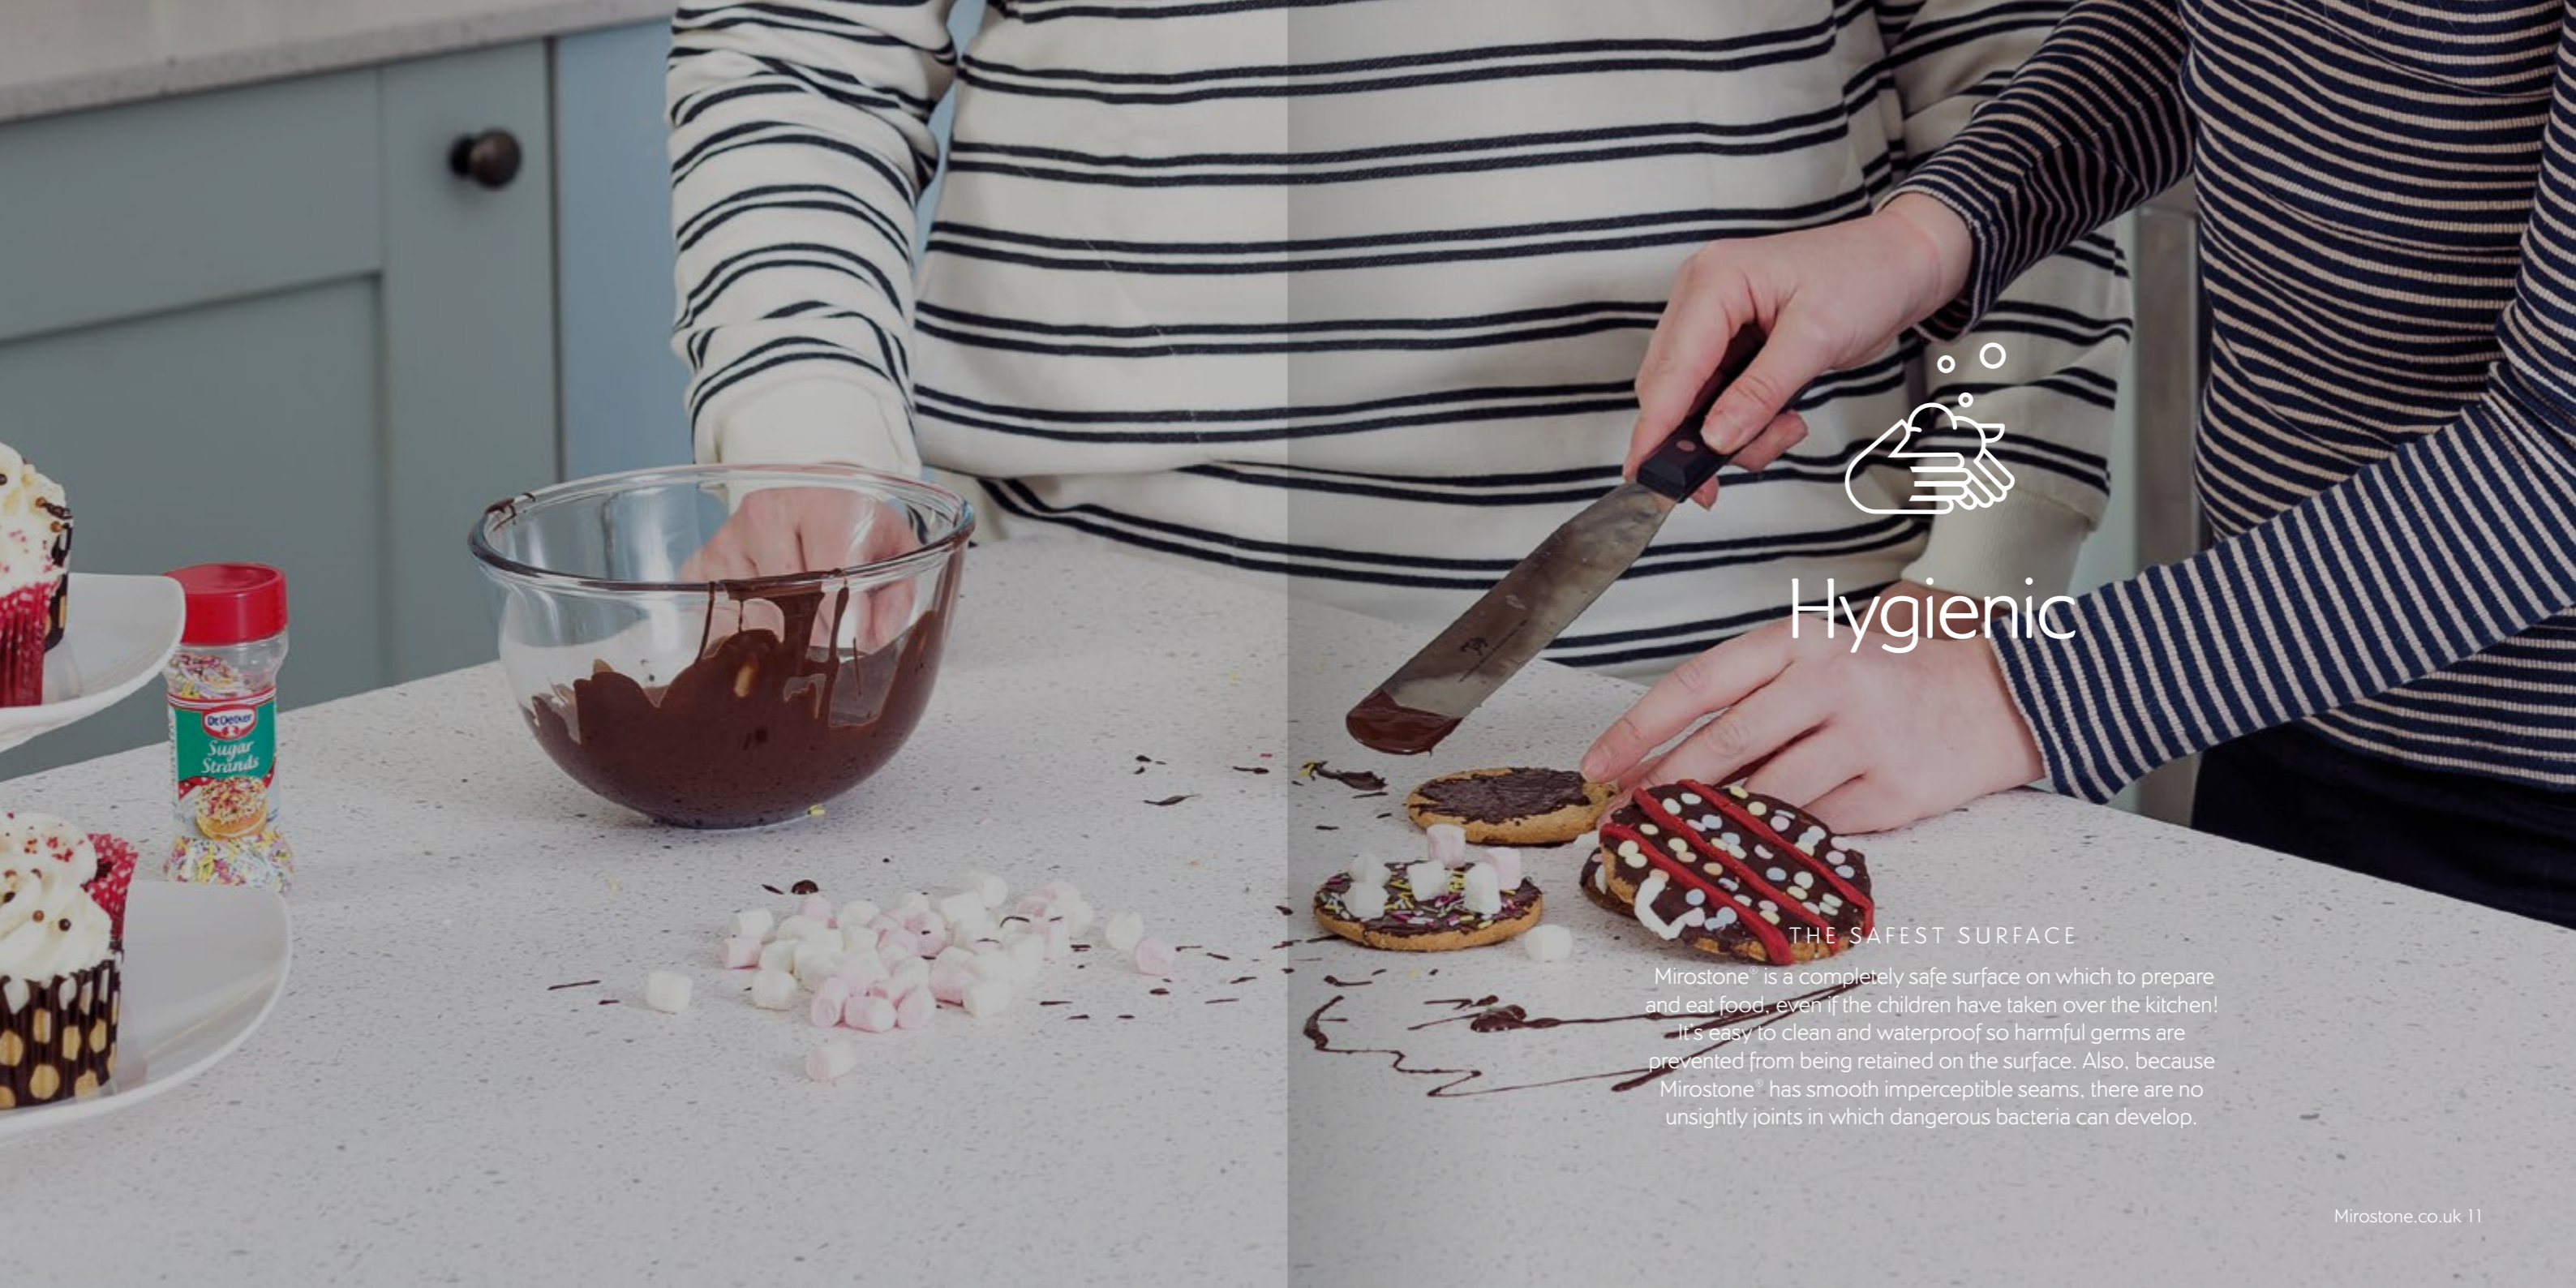

Durable

THE RESILIENT SURFACE FOR MODERN LIVING

Mirostone® is designed for modern living. It's solid construction means that Mirostone® can easily deal with the stresses and strains of being an intensively used surface in the heart of the home: in the kitchen. Please refer to our leaflet: How to care for your Mirostone® solid surfaces.

Hygienic

THE SAFEST SURFACE

Mirostone® is a completely safe surface on which to prepare and eat food, even if the children have taken over the kitchen! It's easy to clean and waterproof so harmful germs are prevented from being retained on the surface. Also, because Mirostone® has smooth imperceptible seams, there are no unsightly joints in which dangerous bacteria can develop.

Waterproof

PERFECT FOR ALL WET AREAS

Mirostone® is a pure solid surface through and through. It has no chipboard or MDF core, making Mirostone® completely waterproof. Even the hot steam from an opened dishwasher cannot damage Mirostone®! This non-porous quality makes Mirostone® one of the most hygienic surfaces available.

The 100% waterproof quality of Mirostone® makes it one of the most hygienic surfaces available, because a clean, dry surface prevents bacteria from developing.

Easy to maintain and user friendly, Mirostone's surface washes off every day marks with just soap and water, leaving it looking as good as new.

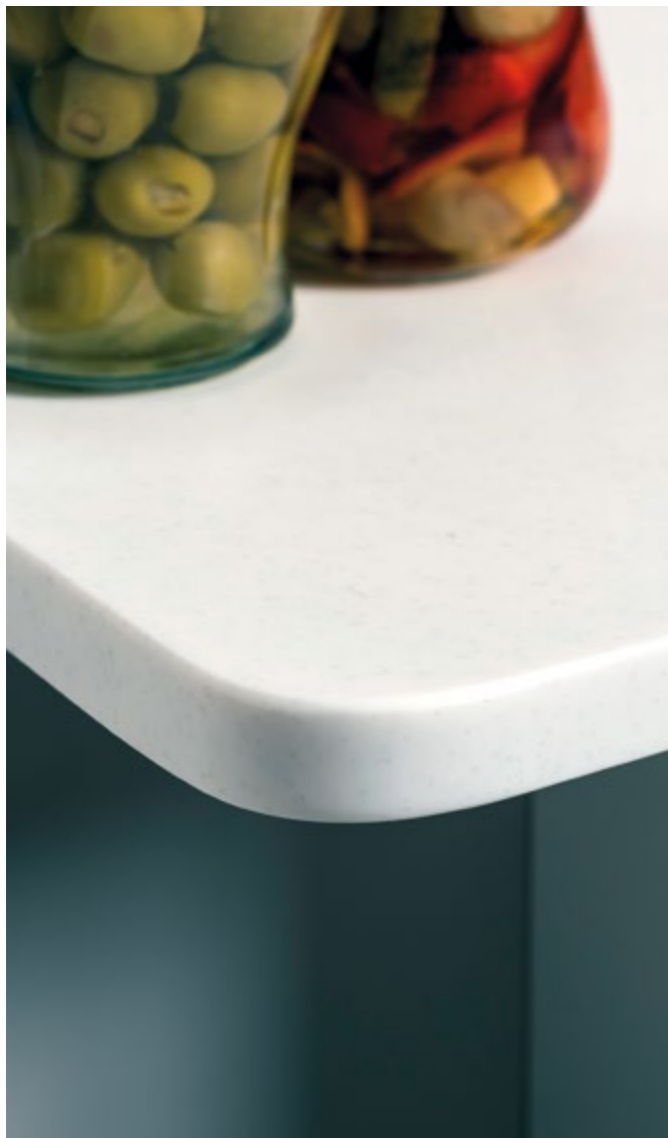

Seamless
integration

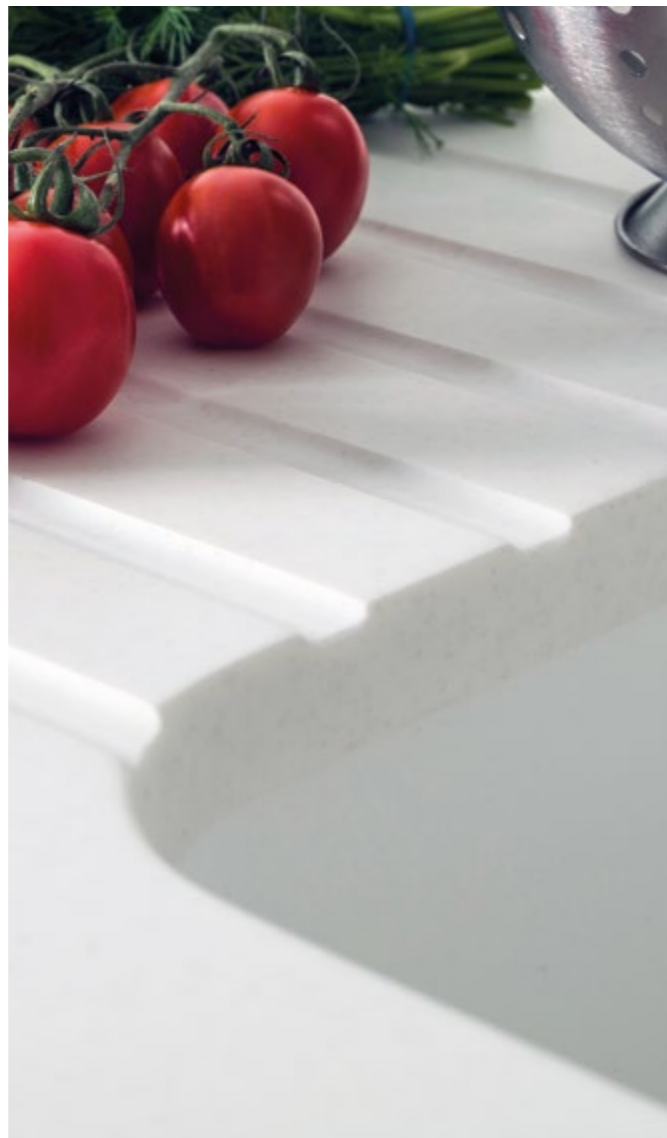

JOINTS THAT ARE INCONSPICUOUS!

Simple yet classy. Mirostone's seamless joints create a naturally flowing appearance that is not only smart, but also hygienic, completely waterproof and so easy to clean. Better still, Mirostone's pure acrylic sinks and bowls can also be seamlessly integrated into Mirostone's super-hygienic surface.

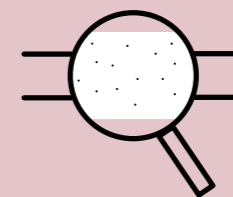

Ahead of the curve

Mirostone® can be easily curved without any loss of colour or the need for unsightly joints. It can follow the contours of your cabinet design or give you a great looking and safe curved corner on your island unit.

Get into the groove

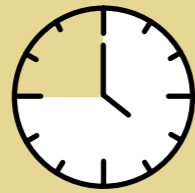

Hygienic drainer grooves can be easily installed into your Mirostone® surfaces beside your under-mounted sink. And all this is done without any loss of colour or durability.

Colour all the way through

CONSISTENT THROUGHOUT

Mirostone's colourful stone effects are not just skin deep, they run consistently throughout its thickness. So now you can have uniquely stylish and practical worksurface features. Take a look at the page opposite to see two of those features.

Speed of fitting

NO SPECIAL TOOLS NEEDED

Mirostone® can be safely installed in your home using standard woodworking tools. So Mirostone® successfully avoids all the time consuming delays and inconvenience of other surfaces.

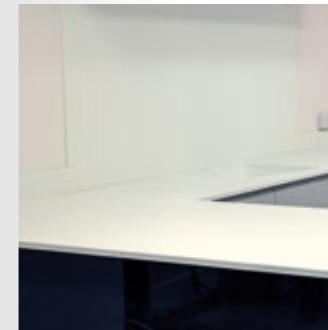

And, the new silky surface texture of Mirostone® saves your installer time during the final finishing stage.

Step 1
Your installer fits your kitchen cabinets.

Step 3
The breakfast bar is fitted with a seamless joint to the work surface.

Step 5
The splashback and upstands are installed.

Step 2
The Mirostone® work surfaces are cut to size and placed on top of your cabinets with the sink fitted.

Step 4
The decorative end panel is fitted seamlessly to the breakfast bar.

Step 6
The hob is integrated into the Mirostone® surface.

And Hey Presto!
After the final finishing stage, your Mirostone® installation is complete, leaving you free to enjoy your beautiful new kitchen.

Ready to go with a 10 year warranty

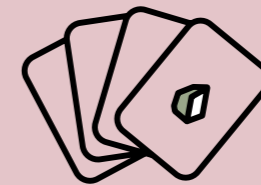

PEACE OF MIND

Its reassuring to know that all Mirostone® surfaces have a 10 year warranty. Ask your kitchen designer or installer for a care and maintenance kit and a copy of our leaflet: How to Care for your Mirostone® Solid Surfaces. Full details of our 10 year warranty are enclosed.

SIZE MATTERS

At 630mm wide, the worksurface is wide enough for your cabinet design. And at 960mm wide you have all the space you need for your island unit and breakfast bar area. Meanwhile, the splashback and upstand sizes will fit all rooms. And one of the amazing features of Mirostone® is that your installer can seamlessly join 2 components together to double the component size!

Something for everyone

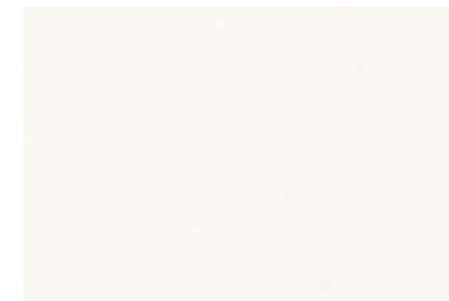

SIZE MATTERS

Breakfast Bar
2000 x 960 x 20mm

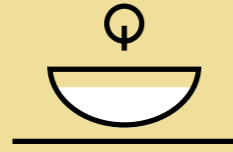

Splashbacks
3000 x 760 x 12mm

Upstands
3000 x 100 x 12mm

Surface Finish

Being solid, your Mirostone® will be hand finished by your installer. We recommend when installed into a kitchen that Mirostone® is finished to a soft sheen. This will leave a surface that is beautiful, yet easy to maintain. It is possible to finish Mirostone® to a high gloss, however this is only suitable in areas where use of the surface will be gentler: such as in a typical bathroom. Please consult your installer to find out more details.

*These designs may require additional maintenance. Please refer to our leaflet 'How to care for your solid surfaces'.

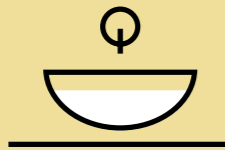

Wide range of sinks, bowls and drainers

INTEGRATION

Mirostone® pure acrylic sinks and bowls fully integrate with Mirostone's worksurfaces inconspicuously, leaving no overhanging rims. These features ensure a completely hygienic, easy to clean surface with a smooth, seamless look. Drainer grooves can be graduated from 2 - 5mm to create a waterfall effect that drains away drips and splashes. All brands, materials and styles of under-mount sinks can be used in conjunction with Mirostone®.
